

Viewing clipart as a picture

When trying to insert clipart sometimes you will get just a name of a picture rather than the actual picture. Follow these steps to view you clipart as a picture.

1. Once you have the clipart window open (insert, clipart in SMART Notebook) the window to insert clipart will open.

2. Choose the folder of the category of clipart you want. Then click the dropdown arrow next to the menu icon and select Thumbnails. Now all your clipart should be small thumbnails of the clipart picture.
