

Connecting your Elmo to a Projector

1. Plug the blue RGB cord into the "RGB Output" on the Elmo Projector.
2. Plug in the power cord to the "DC IN 12V" hole on the Elmo Projector then into an outlet.

3. Plug the opposite end of the RGB cable *either* directly into the Audio Visual box in the slot marked "computer",

OR

plug into the splitter box into the "input" slot.

You are ready to turn on the Elmo for use!
